

PAYMENT SOLUTION

VIETNAM

Vietnam has yet to become a major threat to bricks-and-mortar sales in e-commerce market. Having a young population rapidly embracing mobile commerce, and a double-digit sales growth in the coming years, it is a market that should be considered by merchants on the quest for emerging markets. Cards, particularly debit cards, are still the dominant payment method in Vietnam used for 34 percent of transactions. However, digital wallets are set to be the fastest-growing e-commerce payment method in Vietnam in the coming years.

UBank Connect in Vietnam
